

HINDERMANN **MANUFACTURER CATALOGUE**

MOBILE TRAVEL | 2019

NEW: with HINDERMANN experience tip!

from the left: Manfred Hindermann, Tobias Hindermann

Dear

Customers, business partners and potential customers,

“Protect to preserve value”, this is and has been an essential part of our daily work for over 65 years.

You are holding the result in your hands: the new HINDERMANN MANUFACTURER CATALOGUE 2019.

A catalogue of products characterised by traditional quality and sophisticated solution approaches. Using high-quality materials is only one important component. The combination of craftsmanship and modern manufacturing processes guarantees reliable processing.

The attention to detail, without losing sight of the whole, helps us in our pursuit of highest quality and appropriate customer value. Each product from HINDERMANN should bring you added value. That is what we stand for.

We invite you to experience our new products and developments.

With best regards from Westphalia,

HINDERMANN GmbH & Co. KG

SUN PROTECTION

HINDERMANN **SUN PROTECTION MAT SCREEN**

Fastening to partially integrated parts

Fastening is simple: There are inner pockets in each door area, which can easily be mounted over the edges of the door. Bungee cords are included in the delivery which can be attached to the side mirrors or the wheel housing.

Screen colour - matte: Light grey

The screen mat shown above allows you to look inside from outside.

Size / Vehicle	Article No.

HINDERMANN **SUN PROTECTION MAT SCREEN RM.I**

Universal version for integrated motor homes

This innovative sun protection mat with its specially woven, open-pored surface provides ideal protection against sunlight and unwanted views, but allows the view from within.

It is placed centrally on the wind shield and fixed to the holder of the top exterior mirror (see photo), by means of an internal rubber tensioner along the top edge.

For vehicles without top exterior mirrors we recommend attaching the snap-on hooks of the rubber tensioner to the LOXX press-studs (the bottom part of which can be glued or screwed).

There are four lashing straps with plastic eyelets along the bottom edge. The windscreen wipers can generally be covered up too or lie on top of the mat as an added means of securing it. Various rubber tensioners are included as standard. The rubber tensioners can be shortened with scissors if need be.

Generally speaking, the window matt can also only be fastened using LOXX press-studs. (For a description of LOXX press-studs see catalogue page 54 - one pack contains two pieces)

From outside:

- sun protection
- visual protection

From inside:

- unimpeded view
- provides shade

Suitable for	Material	Article No.

HINDERMANN THERMO MAT LUX & LUX-DUO

LUX 1
traditional standard design

Lightweight and custom fit

Protection from cold and heat

On request with LUX-DUO bottom section

The one-piece LUX and LUX-DUO outer insulation mats provide both ideal heat insulation for winter travels and effective protection against the sun's rays for the summertime. When used in winter, outer insulation increases the surface temperature on the inner side of the panes, thereby considerably reducing the risk of condensation forming inside the vehicle.

If the window mat is closed over in summer, the sun's rays won't get through the glass pane in the first place, meaning the interior will not heat up so easily.

In beautiful sunny winter weather the front flap can be opened, allowing the sunshine to add to the heat to the interior, saving the camper heating energy costs.

Material:

The outer surfaces of the material are made of strong weather-resistant PE fabric. The light-weight approx. 20 mm thick interior insulation is made of polyester and does not absorb moisture. The material is winter-proof and is easy to roll up or fold even in very cold weather.

Included in the scope of delivery:

5 LOXX press studs, 8 rubber tensioners and 230 cm Velcro strap for fastening LUX thermo window mat for integrated mobile homes (See detailed photo LOXX press studs p. 54).

As spare set: Art. No. 8950-0000

LUX 2
for particularly high vehicles

LUX 1

Traditional standard design, customised for all standard integrated models.

LUX 2

The LUX-2 version differs from the LUX-1 only in its middle bar along the top edge. This enables added convenience in handling when opening and closing the front flap (without ladder/step stool) in vehicle models with an especially high front end.

Accessory:

Screen insert as a means of sun protection and visor
HINDERMANN offers an interesting optional accessory for this model: a detachable screen insert. The screen insert acts externally as a means of protection against the sun and as a visor, while ensuring unobstructed outward vision from the inside.

LUX-DUO:

To ensure effective protection against cold draughts from the non-insulated engine compartment, the wheel arches and the footwell, HINDERMANN has developed the add-on module LUX-DUO for winter holidays too. This is a lower section that can be connected to the window mat by means of a Velcro fastening. It is made of the same material. The insulation in the "lower part" is however a little thinner; this is to save on bulk while travelling. There is also a wind-proof cover with integrated eyelets on the bottom edge, offering the entire driver's compartment effective protection against any penetrating cold. LUX window insulation and the LUX-DUO add-on module can also be purchased individually.

Scope of delivery:

Included in the delivery: rubber tensioners, LOXX press-studs and breathable TYVEK storage bag.

HINDERMANN THERMO MAT LUX & LUX-DUO

Accessories: Removable screen insert available as an option.

A three-dimensional door pocket for the driver's door ensures secure hold.

Attachment:

Attaching it to the vehicle is easy: An internal pocket is attached in the driver door area, hung over the edge of the door.

HINDERMANN INSULATION offers two options for attachment on the passenger side:

a) Attachment with welt tracks

(horizontal and/or vertical)

The insulation mat has textile welting attached along the top edge as well as loosely attached textile welting with a very wide Velcro fastening. The insulation mat is guided into the horizontally attached welt track. The loose welting with Velcro fastening is guided into the vertical rail in such a way that the insulation mat can be attached at the top. (See photos page 9). The advantage of this form of attachment is a tight seal on both sides. What's more, no water (snow) can run behind the mat in the welt track area.

You can use just one welt track if you like. Welt tracks are not included as standard.

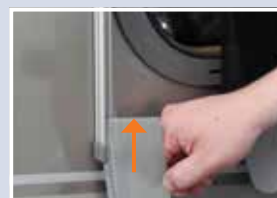

b) Attachment using five LOXX press studs

which are included as standard with every insulation mat. Their lower parts can either be bonded to the vehicle (e.g. with Sikaflex sealant) or screwed in. The advantage of this type of attachment is its inconspicuousness.

NOTE: The welt tracks or the LOXX press-stud bottom sections should always be assembled by your local professional workshop.

You can attach the LUX insulation mat using one of two methods:

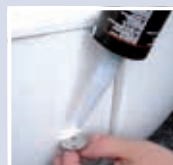

Attachment with welt track (version a):

- 1** Insert insulation mat into the upper track.
- 2** Insert the separate textile welt underneath the mat into the track.
- 3** Velcro on thermo mat.

Advantage of this solution: Neither water or snow get in between the pane and the insulation mat.

Fastening with LOXX press studs (variant b):

Detailed photos of the installation of the LOXX fastening.

Complete list: see page 12

HINDERMANN INSULATING MAT LUX & LUX-DUO

Quality features

Available individually:

window cover LUX

insulated bottom-part LUX-DUO.
To protect against cold and draught.

HINDERMANN INSULATING MAT LUX & LUX-DUO

Material:

The exterior surfaces of the material are made of weather-resistant, strong PE fabric. The light-weight approx. 20 mm thick interior insulation is made of polyester and does not absorb moisture. The material is winter-proof and is easy to roll up or fold even in very cold weather.

LUX-DUO add-on module:

To ensure effective protection against cold draughts from the non-insulated engine compartment, the wheel arches and the footwell, HINDERMANN has developed the add-on module LUX-DUO for winter holidays too. In combination with the top part, the LUX window mat, this creates a large **two-piece THERMAL INSULATION** for the entire driver's cab. The attached wind guard protects against draughts from underneath the driver's cab.

Product Features:

- You save heating and increase the living comfort during your winter holiday thanks to the extensive complete insulation of the vehicle front.
- The material is identical to the window sheet, however it has a slightly thinner insulation (to cut bulkiness during your trip).
- An attached wind guard protects against draughts from underneath the driver's cab.
- Once assembled, both combined parts can be removed together and later reinstalled together again.
- The extension module can also be purchased individually at a later date.

Bottom part: LUX-DUO. For protection against cold from the engine bay, wheel houses, driver's cab doors.

Attachment of the add-on module:

The LUX-DUO extension module comes with an additional integrated Velcro band along the upper side of the insulation mat, which connects to the LUX top part.

In comparison: left a vehicle without insulation, right a vehicle with ThermoJacket. The lighter the area the greater the heat loss. The heat insulation in the area of the window panes and doors is noticeable.

HINDERMANN THERMO MAT CLASSIC

Product Features:

- Protection from cold and heat
- Reduces the interior temperature during sunshine in summer
- Outward vision possible by opening front
- Universal suitability for vehicles with and without darkening systems with door pockets
- Accessory: optional detachable screen insert.
- approx. 10 mm black coloured insulation for opacity and high thermal insulation. Saves on heating energy costs.
- With pull straps for ease of opening
- Covered air vents prevent cold drafts in the Ducato typee 250 (from 2007), typee 290 (until 2014).

High-quality external insulation mat which is distinguishable by its great insulation properties in winter and light-weight design. The material is winter-proof and is easy to roll up or fold even in very cold weather.

As is standard with HINDERMANN external insulation mats, the front flap opens in the CLASSIC version too. We recommend keeping the driver’s compartment doors slightly ajar while attaching the mat in order to hang the adjustable door pockets. This ensures that the insulation mat is securely positioned and sits perfectly.

Material: silver Thermosandwich. Rubber tensioners and a storage bag are included as standard.

- Reflects the sun
- Privacy protection
- Outward vision possible by opening front
- Rubber tensioners included in delivery, they also enable the secured support of an opened front flap
- Outer surface with special UV radiation protection

NEW!

HINDERMANN UNIVERSAL WINDSCREEN INSULATION

For integrated motor homes

This universal windscreen insulation is adjusted specially for the measurements of integrated motor homes. It insulates against cold in winter and keeps the interior cool in summer. In good weather you can open up the front and observe activities and events outside the vehicle.

Material and design:

The material is a new, weather resistant thermo foil with aluminised UV stabilised polyester sheets and all-round enclosed edges for the windscreen. The front cannot be opened.

Attachment:

An internal rubber tensioner along the top edge ensures a tight seal and enables quick attachment. There are four lashing straps with plastic eyelets along the bottom edge. The windscreen wipers can generally be covered up too or lie on top of the mat as an added means of securing it. Various rubber tensioners are included as standard. The rubber tensioners can be shortened with scissors if need be. The rubber tensioners can be fastened to the bracket of the top exterior mirror (see photo). For vehicles without top exterior mirrors we recommend attaching the snap-on hooks of the rubber tensioner to the LOXX press-studs (the bottom part of which can be glued or screwed) or fastening the window mat using two adhesive LOXX press-studs (for a description of LOXX press-studs see catalogue page 54) (one pack contains two pieces)

Note: The rubber tensioner is already incorporated.

Attachment example with LOXX press-stud. The rubber tensioner can be used for fastening too.

HINDERMANN INTERNAL INSULATION MAT TRAVEL

for van conversion

Protects the interior against sun, heat and cold. Stops people looking in from outside.

Manufactured from HINDERMANN Thermo foil, coated on both sides with an aluminised polyester sheet. The edges are tightly framed all around. There are pull loops along the top edges.

The mat is attached by means of large quality suction cups, which have a high level of holding power. These sit in pre-assembled clip eyelets, which don't tear out. The suction cups with knurled head screws are enclosed loose – not assembled!

The insulation mats for the side windows of the driver's cab are designed in a way that the outer contours are clamped in the door rubbers so that an insulating air cushion is created between the window cover and the window panes!

The specifications for the VW T6 Living area refer to vehicles with plastic window frames such as the Multivan, Caravelle or Shuttle.

HINDERMANN INTERNAL INSULATION MAT PREMIO

NEW: Magnetic fastener without suction cup

see the review in Bordbuch 2019

Colour light beige

Colour light grey

Magnetic fastening to the window frame
To make the PREMIO suitable for several mirror variants, we have the following elegant solution: After attaching the mat, the additional element is glued on.

This innovative driver's cab insulation are designed to provide effective protection against cold and noise in a homely design.

The 3-piece set consists of an approximately 8 mm thick foam insulation, which is extends to the living area and is covered with a polyester velour, which creates a pleasant room atmosphere. The outer surface is coated with an aluminised polyester film that reflects the sun's rays and helps keep the heat out in the summer. The insulation end at the window panes.

The simple magnetic fastening is a new feature. A self-adhesive magnetic strip is included for the windshield, which is glued to the textile window frame during initial installation as a counterpart to the sewn-on magnetic tape (see photo).

For vehicles without an interior blackout system (W/OB, the door window mats are also fastened by welded-on magnets.

For vehicles with a built-in interior blackout system (W/B) the door window mats are inserted between the blackout frame and the window. They seal all the way round

The insulating mats can be stored rolled up in a PE travel bag (included in delivery).

W/OB = suitable only for vehicles with non-in-built interior blackout systems

W/B = suitable only for vehicles with in-built interior blackout systems

HINDERMANN **THERMAL CURTAIN**

Thermal curtain for the drivers cabin for Ducato 2007/2014

This U-shaped thermal curtain separates the driver's cab from the dashboard area. It insulates against cold radiation from the unheated driver's cab and protects against loss of heat in the living area. It has been part of the Hindermann range for many years and enjoys increasing demand due to its homely atmosphere and high level of usefulness.

The highlight of these models is the easy attachment: There is a clip along the top edge which is moved between the roof liner and the sun visors or laid around the sun visors. Only a few press studs along the B-pillar ensure a tight seal and hold. The press-stud top parts are integrated, the bottom screw parts are included in the delivery.

If there is no frost outside, and you are in a hurry, you only have to put up the curtain and slide the clip between the roof liner and the sun visors. This way, side mounting is not necessary.

Material: The insulation is manufactured from approx. 8 mm thick PU foam core in a sandwich structure. In the direction of the living area it shows a light grey polyester velour and to the outside an aluminised polyester sheeting. In the direction of the living area it shows a light grey or light beige polyester velour and to the outside an aluminised polyester sheeting.

Detail for Ford Transit and Sprinter: Simply lay the fastening clips around the sun visors and secure with Velcro, attach to the sides with press studs.

Fischer cavity fixings A4 or Tesa powerstrips can also be used for mounting on the B-pillar.

HINDERMANN FOOT WELL INSULATION

Protection against penetrating cold in the foot well

An effective addition to the thermal screen. In exactly the same way this dividing mat insulates against cold draughts and heat loss in the foot well.

- especially for the footwell area of the Ducato 2007 / 2014, below the dashboard, and for the cab floor between the seats. Thanks to the three-dimensional trough shape, the insulation closes tightly in the area of the driver's cabin door and prevents cold draughts from entering the entrance area.
- The Ford and Sprinter versions are trough shaped, however, they do not have a cover between the seats.

HINDERMANN COLD PROTECTION

A mounted fly screen door is no obstacle, see photo example.

DGM 202013103919.5

Thermal curtains for sliding door of Ducato

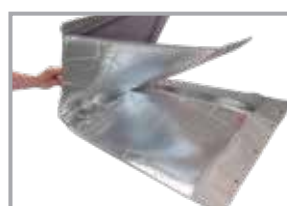

Increased living comfort in the van through effective heat insulation with convenient access.

Description: This thermal curtain perfectly fits the door opening of the Ducato Type 250/290 (model from 2007, variant with high door opening) - universally suitable for most versions and installations of individual vehicle dealers. As shown in the example, the fly screen door can remain mounted, even when the sliding door is closed! The thermal curtain comes with a shoulder-wide access. The "flexible door" adapts to the shape of the B-pillar in the edge area, and clips at the bottom and top ensure a tight seal.

Adaptation options: In some cases, for the initial assembly, it might be necessary to perform some adjustment work, such as cuts or cutting off protruding material. For this, the thermal curtains in the edge areas can be cut easily, without diminishing the insulation function, for example in the area of the wall cabinet.

Installation of the sliding door insulation: The insulation is fastened along the top edge and in front of the kitchen block with a few press studs. A clip fastened with Velcro ensures a tight seal between the kitchen counter-top and the wall cabinet. The press studs are pre-mounted, the bottom parts as well as assembly instructions are part of the delivery scope.

Material: The sandwich structure is constructed the same way as for the thermal curtain for the driver cabin (see page 18). The aluminised polyester foil does not absorb any moisture, if, for example, there is rain/snow when the sliding door is open.

The sliding door insulations can be folded which saves storage place

HINDERMANN COLD PROTECTION

Thermal curtain for the rear doors of the Ducato in 2 versions:

- **one-part rear door insulation**, which can be fastened inside along the top edge over a two-row press stud panel (if a wall cabinet is installed, fasten from the outside).
The access to the storage space underneath the bed and the gas bottle locker can be conveniently accessed by opening 2 zips.

Material:

For both versions, the sandwich structure with 8 mm thick insulations and polyester velour is identical to the material of the sliding door insulation or the thermal curtains for the driver's cab.

Increased living comfort in the van through efficient heat insulation in the sleeping area.

One-part: Interior installation with press stud panel. When open, the heat remains in the living area.

HINDERMANN DO-IT-YOURSELF

Thermo velour with 8 mm PU foam

This thermal material, tried and tested over many years in our thermal curtains, is now also available as a DIY kit for do-it-yourself assembly. You can use it to create e.g. window covers, thermal insulations below the sleeping area or covers yourself. The material can be cut to size using scissors or a knife. Scope of delivery: Size approx. 350 x 148 cm, 15 large suction cups á 40 mm ø, 9 metres light grey border tape made of polyester as well as foil for taking off a template.

Version	Colour	Article No.
Complete kit	light grey	7352-7430

Thermo foil

For cold and heat protection and sun reflection, easy to use, universally suited for camping, the car, the boat and the home. Composite bubble foil with aluminium-coated polyester foil and fabric reinforcement on both sides.

HINDERMANN COLD PROTECTION WINDOW MAT

For caravan and camper van vent windows

The special feature of this newly developed insulation mat is the side tight closure between the window edge and the vehicle. It is pulled in to a welt track above the window. Comes with integrated LOXX press studs for attachment along the underside, including loose adhesive bottom parts.

The mat can be conveniently rolled up and fastened with 2 tensioning straps (50 cm each, with metal clip). The helios grey exterior insulation mat is manufactured from a 5mm thick and fully porous winter-proof PVC foam. The mat remains flexible even in very cold weather. Along the top side is a textile grip-strip (Ø 7,0mm), the other 3 edges of the insulation mat are trimmed with tape.

Due to the lateral padding the outer dimension of the mat is 7 cm broader than the window size. (Please consider for the welt track.)

Safety instructions: The cover must be removed before travel.

Lateral padding strips with tight seal

HINDERMANN MOSQUITO CURTAIN

Magnetic attachment – quick and easy

Living with open doors

Lets in plenty light and fresh air

Good outward view

Multi-directional zip fastenings to be operated from outside and inside

Keeps pests out!

To keep troublemakers like mosquitoes and flies outside and increase living comfort, HINDERMANN has further optimised the famous insect-protection curtains.

‘HINDERMANN INSECT PROTECTION CURTAINS’ are custom matched to the body cut-out of all vehicle models and always provide full coverage of the opening. Lead curtain tape is sewed on along the bottom edges as a seal.

All versions have multi-directional zip fasteners, can be operated from inside and outside and enable problem-free access. For example, on the curtain for the rear door of the Ducato the zip fastenings are positioned in such a way that the rear window can be opened with ease (photo p. 29) or that access to the gas cylinder cabinet or the storage compartment is possible without having to open the entire area.

Material:

The material is a close-meshed, grey, non-flammable polyester fabric with very good visibility outwards (see photo p. 29) and good air circulation. It shields up to 65 % of sunlight, thereby significantly reducing the build-up of heat in the vehicle.

Rear door assembly:

The curtains are easy to attach due to the magnetic fastening. No press-studs, no Velcro straps. The curtains can be removed again just as fast or, alternatively, left in place while travelling. No adjustment need be made while disassembling.

The curtain for the rear flap of the VW T5/T6 has the magnetic fastening too, only the fastening is provided in the form of a Velcro strap on the inner lining at the level of the tail lights. A self-sticking Velcro strap is included as standard.

Sliding door assembly:

A magnetic fastening is used for attachment. Adjustments are not necessary. A multi-directional zip fastening operable from inside and outside is integrated in all models.

Tight surrounding seal with magnetic fastening

Round magnetic points

Magnetic strip on door seam

HINDERMANN **VEHICLE COVER**

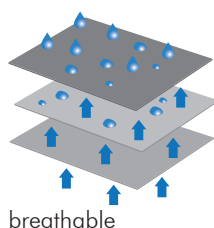

Tyvek SUPRA-FC

FC impregnated to be water- and dirt-resistant.

In this way, there is no breeding ground for algae, moss and flower pollen

Improved UV protection

Reduced weight facilitates handling

Impressive Advantages

- 3 different universal basic shapes for caravans, camper vans and partially integrated camper vans enable a proper fit for your vehicle. For this please inform us of the largest circumference of your vehicle, taking into account all protrusions, e.g. bicycle rack.
- The material effectively doesn't rub on glass and paint. To avoid friction with the bodywork and glass a very secure and sturdy fastening system is included in the delivery. Therefore the scope of delivery of every protective cover contains a large quantity of webbing belts as standard, which are simply inserted into the eyes available.
- 4 covered zips on the right hand and left hand side of the vehicle enable door access into your vehicle and make it easier to pull over.
- Pulling over is possible with 2 people, preferably with long telescopic rods (e.g. Gardena).
- In the front and rear area there are tensioning laces with numerous eyes so that the hood can be properly adjusted to your vehicle.
- One roll of window protection cover is delivered as standard with every cover (50 cm wide, 30 meters, nonadhesive).
- As long as vehicle washed beforehand, no abrasion to paintwork.
- Sensible accessories such as cushion or gable profile are also available.
- New: A special webbing belt system adjusted to any size (consisting of 6 to 8 cross belts and 8 belts for the front and rear area) is also included in the scope of delivery.

DuPont™
Tyvek®

**special shapes for caravans,
and partially integrated**

The particular advantages of Tyvek Top Cover

It protects against:

- Ice, snow and moss
- Rain, dirt, dust and heat
- Acid rain
- Soiling resulting from bird droppings and trees
- Bleaching of upholstery
- Bleaching and matting of paintwork
- Drying out of sealings
- Extra wide doorway is possible due to zips integrated at the front and back, the rolled up surface is kept in place by a Velcro fastening
- No stagnant moisture

HINDERMANN **VEHICLE COVER**

4 zips all around, for easy covering and removal.
This means easy access to the service flaps and the
storage boxes on the left hand side of the vehicle.

alcove motorhomes, integrated mobile homes

The special advantages of DuPont™ **Tyvek®**

- TYVEK SUPRA-FC is a multi layered and environmentally friendly HDPE textile and is manufactured by the innovative DuPont group in Luxembourg.
- The whole of the cover is breathable (including all of the side surfaces).
- Can rest directly on the vehicle surface
- Breathable even when covered in snow
- Moisture can evaporate
- Light and silky, stays flexible even during cold weather
- Washable up to 30° C (without adding washing powder)
- saves spring cleaning
- Tyvek-SUPRA-FC has a high tensile strength and durability and is made in the hard wearing colour grey.
- The standard scope of delivery of each protective cover includes, the tried and tested storage and transport bag made of Tyvek, also a specially co-ordinated tensioning system.

HINDERMANN ACCESSORIES FOR VEHICLE COVERS

Webbing Belts

A special webbing belts system specially adjusted to any size (consisting of 6 to 8 cross belts for the front and rear area) is included in the scope of delivery of all vehicle covers. Replacement set consisting of 4 belts (240 cm) for front and rear area and 3 cross belts (380 cm) for the underside of the vehicle.

Replacement set belts

Article No. 7095-0000

Gable profile

Gable sections for camper vans and caravans help make the draining away of water from your protective cover more easy and prevent/reduce possible puddles. They are suited to each roof of your caravan or camper van and can also be subsequently used for previously available Hindermann protective covers. The gable height of approx. 26 cm is higher than the roof window and antenna. The 2-part gable section with dovetail joint (precision component cut using water jet) comprises of solid and weather resistant PE foam which does not absorb any water. It is assembled in the central section and always stabilised with 4 foot supports. Its positioning and the number of spacing sections is affected as required. Contents: 2 units (may only be supplied as pairs, also useable for roof protection cover). Length of package: only approx. 120 cm!

The height of the hood is always approx. 35cm less than the whole vehicle height. Take into account all protrusions e.g. the bicycle rack. Subject to low measurement tolerances.

HINDERMANN ROOF PROTECTION COVER

universal for camper vans and caravans

Belt held by inserted multifunctional welt.
(not included as standard, see page 60)

The breathable roof protection covers are universally conceived for use on a caravan or mobile home. They have an eyelet strip all around, so that the protective cover can be tensioned exactly according to your needs, with the standard belt system.

For caravan owners, we have also integrated a textile welt on the right lengthwise side, so that the cover can be pulled onto the awning rail, and the wind has no chance.

The eyelets used have integrated reinforcement and an underlying protective strip, so that the eyelets do not come into contact with the vehicle.

Due to the adjustable length, you can decide yourself whether you only want to protect the roof area of your vehicle, or also the front and/or rear area.

(Safety instructions: designed for stationary vehicles, therefore not suitable for driving or living operation.)

The belt tensioner is included in the standard scope of delivery!

No metal construction required.

As accessories (see page 34) we recommend:

HINDERMANN **GABLE PROFILES**

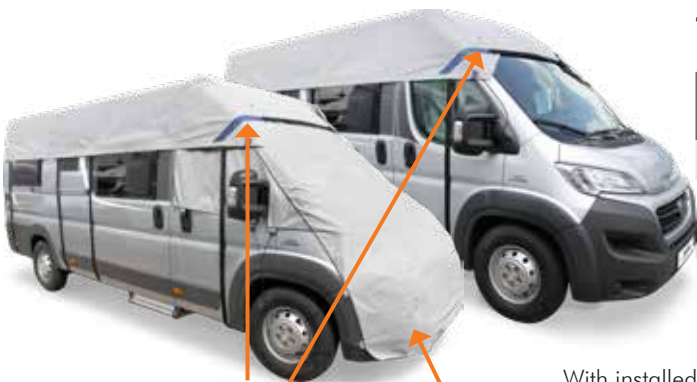

HINDERMANN **CORNER PROTECTORS**

HINDERMANN **SPACERS**

Including belt system

ASSEMBLY

HINDERMANN VEHICLE COVER

Tyvek SUPRA-FC

FC impregnated to be water- and dirt-resistant.

In this way, there is no breeding ground for algae, moss and flower pollen

breathable

Product Features:

- Keeps the ventilation shaft and windscreen wipers ice-free.
- Protects the vehicle against ice and snow.
- Protects the interior against direct sunlight and warming.
- Unwanted insights into the vehicle are prevented.
- easy installation by hanging on the edges of the doors
- The covers remain flexible even when it's cold.

HINDERMANN CARAVAN-BOW PROTECTION COVER

Also usable on the rear side.

made of Tyvek SUPRA-FC

In winter it keeps the gas bottle locker free of ice and snow, and prevents possible draughts. Fastened via attachment welt and eyelets on the lower edge to tension (tensioning material is not included in the scope of delivery).

Safety instructions: The cover must be removed before travel.

Size (WxH)	Colour	Article No.

240 x 200 cm	grey	8989-5440

HINDERMANN FRONT PROTECTION COVER

with elastic band without insulation

Universal for integrated mobile homes

made of Tyvek SUPRA-FC

The front protective cover extends around the sides to varying degrees (depending on the vehicle model) and is fastened with two eyelet straps and rubber tensioners on each side. A rubber strap provides a tight seal along the bottom edges and a rubber tensioner provides a tight seal along the top edge. This rubber tensioner can be fastened to the brackets of the top exterior mirrors on both sides (see photo). For vehicles without top exterior mirrors we recommend attaching the snap-on hooks of the rubber tensioner to the LOXX press-studs (the bottom part of which can be glued or screwed). Generally speaking, the front protective cover can also be fastened using only two adhesive LOXX press-studs. (For a description of LOXX see catalogue page 54) (one pack contains two pieces)

HINDERMANN **VEHICLE COVER WINTERTIME**

**From the specialist
for protective covers**

160 gr/qm, SFS-3,
breathable

Special shapes for mobile homes, camper vans, integrated or partially integrated

The new WINTERTIME range for HINDERMANN PROTECTIVE COVERS and HINDERMANN ROOF COVERS is made from a breathable 3-layer SFS-3 NONWOVEN material, and stands out due to a good tensile strength and low weight.

For a good fit for your vehicle type, you can choose from 4 basic shapes, which universally fit various vehicle models. In addition, rectangular roof protection covers are available.

For camper vans alone, there are 3 basic shapes which are suitable for the various contours, construction widths and construction heights of integrated, compact integrated, partially integrated and alcove vehicles.

Each protective cover has 4 zips which (when open) facilitate covering and removal, and enable access to the entrance door and/or storage boxes on both sides of the vehicle. All protective covers have an eyelet strip and tensioning straps on the front and rear side.

The roof protection covers have triangular straps all around for tensioning.

The tensioning material is included in the standard scope of delivery, as well as a generously sized storage bag and repair set.

BICYCLE PROTECTION

HINDERMANN PROTECTIVE BICYCLE COVER BASIC 2

with reflective strips

protected from below

Basic 2

A three-dimensionally shaped cover, which is pulled on to the vehicle from the rear, and therefore also protects the underside of the bicycle rack. A larger area on the rear side of the vehicle is also protected, but not completely closed. At least the handle bar facing the vehicle must be placed sideways.

Incl. rubber tensioners with hooks, which must be inserted into the hollow seams on site. With large transparent pocket for warning signs. (Warning panel not included).

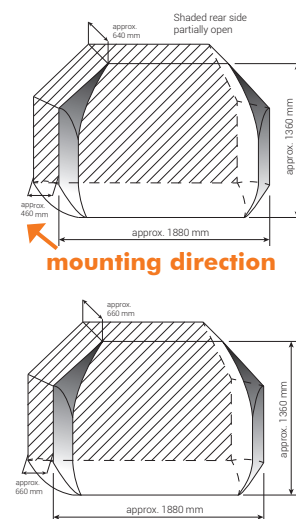

Size	Colour	Artikel-Nr.
up to 3 bikes	grey	8470-2460
up to 4 bikes	grey	8471-2460

Notes:

- Sharp edges such as e.g. pedals, open skid ends or bicycle baskets must be padded for protection.
- **Mounting the protective covers on cars is not permitted.**

rear side

The **BASIC**, **CONCEPT** and **UNIVERSAL ZWOO** covers are made from 300D polyester with high-quality PU coating on the reverse. They fit all bike racks on motor homes and caravans.

A maximum speed of 90 km/h is recommended for motorhomes with bike racks.

BICYCLE PROTECTION

The cover is completely closed all round.

Simple and easy installation standing in front of the rack

All zips easy to reach

TOP fit

with reflective strips

The BASIC, CONCEPT and UNIVERSAL ZWOO covers are made from 300D polyester with high-quality PU coating on the reverse. They fit all bike racks on motor homes and caravans.

A maximum speed of 90 km/h is recommended for motorhomes with bike racks.

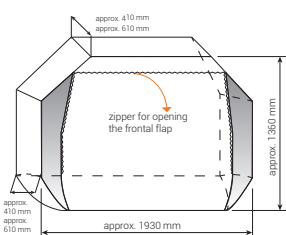

Concept Zwoo

The new CONCEPT 2 is an around closed cover, where the bicycle rack can be stored safely together with the bicycles; as you can see from the photo. On the back wall there are three zips at different heights, for the retaining brackets, through which the brackets are guided. In this way, a tight adjustment to various racks is possible. In addition, the cover can be secured from the outside using various clamping straps. With large clear pocket for warning sign. DGM 20/2014 009642.2

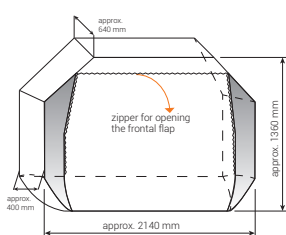

Installation is easy: first of all the zip is opened, the multi-way zips on the rear side are only opened in the area of the bracket. Guide the bracket through. The cover is fastened to the rack with a Velcro fastener. After the bicycles have been positioned, the upper part of the cover is placed over the bicycles. For this purpose, loops are integrated for ease. The front can be closed easily with the zip at body height (see photo 4 on page 49). Additional securing with the HINDERMANN ADDITIONAL BELTS is recommended.

Size	Colour	Kufen-Tiefe	Artikel-Nr.
up to 3 bikes	grey	410mm	8476-2460
up to 4 bikes	grey	610mm	8477-2460

HINDERMANN PROTECTIVE BICYCLE COVER CONCEPT 2

Concept Zwoo 3b/4b

Concept Zwoo 2 e-bikes

Even on the rack up to four bikes need not have their handlebars adjusted, see photo.

← Larger sizes for, for example, two E bikes (pedelecs) as well as bikes with less access. Article No. 8478-2460

Attachment:

1

Put on cover, several zips ensure an individual and leak-proof closure.

2

Position bicycles and fasten.

3

Pull the cover over the handlebar, flip up the front, and close with the zip.

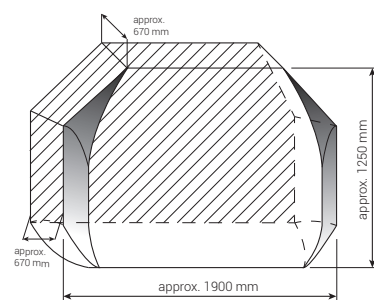

4

The zip can be closed comfortably at body height.

HINDERMANN PROTECTIVE BICYCLE COVER CITY

Protected: from the bottom and large area at the rear side

City – Optimised for use on vans

High-quality protective cover pulled over rack from the back in the direction of the vehicle, thereby also protecting the bottom side of the bike rack from becoming dirty. Two rubber tensioners already on the back. Equipped as standard with sewn-on transparent pocket for warning sign which also serves as an attachment for HINDERMANN EXTRA BELTS (Warning panel not included). **Material:** 210 D polyester, high-quality PU coating on the reverse.

Warning notice: The upper edge of the cover must not project beyond the edge of the roof.

Size	Colour	Article No.
up to 3 bikes	graphite grey	8479-2465

As an accessory for a secure hold, we recommend: **Belt systems e.g. for bicycle rack hoods**

Belts with hooks at both ends for hanging in the eyelets of the transparent pocket for the warning sign (see photo), length-adjustable, one belt for horizontal fastening and one belt for vertical fastening

Set = 2 belts | Article No. 8950-2350

Belts with snap-on hooks for all-round

attachment (see photo), length-adjustable, no attachment to transparent pocket, making these universal and versatile.

Set = 2 belts | Article No. 8949-2350

HINDERMANN PROTECTIVE BICYCLE COVER UNIVERSAL 2

Tailor-made for the particular shape of ready-to-ride wheels.

Universal – For bicycle racks

The protective cover is designed primarily for bike racks mounted on draw bars, but its box shape makes it universally usable, e.g. for scooters on a platform. It is pulled over the bikes from above. Along the lower edge is an incorporated hollow seam for the loosely attached elastic band. The motorhome is equipped with a transparent pocket for the warning sign (warning sign not included).

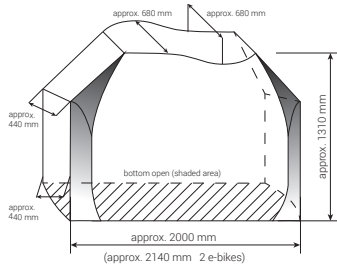

- up to 2 wheels is also suitable for a small children’s bike on a third track
- The new size XL is designed for 3 adult bikes; see image above.
- The bicycle handlebars do not have to be adjusted.

The illustrated straps are not included. To ensure that the case fits snugly and has a secure hold, we recommend the Hindermann belt system item number 8950-2350 with hooks on both sides for looping through the eyelets of the transparent pocket.

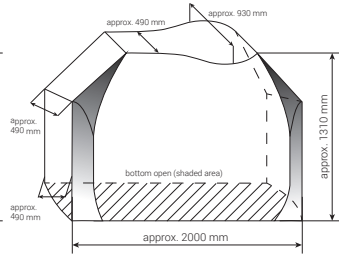

Mounting it on the car is not permitted.

Size	Colour	Article No.
up to 2 bikes	grey	8472-2460

Safety instructions: The cover must be removed before travel.

HINDERMANN INSULATION AND HAIL PROTECTION COVER

for roof hoods (HEKI)

Protect your roof hood against heat loss, hail damage and ageing due to UV rays.

The thermo insulation of this special cover consists of an approx. 4mm fully porous, foamed PVC foam, and a 18mm thick, heat insulating polyester wadding. Apart from the insulating characteristic, it also insulates against a rain shower noise.

The inside surface which comes into contact with the window glass, consists of the particularly gentle and soft Tyvek material. The outer surface consists of a grey artificial leather. The cover can be attached by pulling it over; on the lower edge of the cover there is an elastic strap all around, which ensures a firm hold, together with the Velcro loops in the 4 corners (before installation, the roof window should be cleaned). The forced venting remains unimpeded for safety reasons.

Safety instructions: The cover must be removed before travel.

Our parking tip for motorhomes in Hamburg

If you're travelling to Hamburg with your motorhome, we have a great tip for a parking space for you. It's an official mobile home pitch: Hafenstraße 89, 20359 Hamburg. Experience Hamburg live, right in the heart of this Hanseatic city.

Drive into the Hafenstraße in the district of St. Pauli and turn off shortly before the Landungsbrücken onto the parking lot at the fish market.

Comfort is not to be expected; it is a paved parking lot, after all. Electricity, waste disposal and supply facilities are not available. Parking (parking machine) is accordingly expensive (Monday to Friday €12.50, Saturday and Sunday €19.00).

Nevertheless, these parking lots are very much in demand, as the view of the shipping traffic in the harbour and of the Elbphilharmonie makes up for everything. In order to enjoy the view of the Elbe from the first row, we recommend an early arrival.

You park right at the famous Fish Market in St. Pauli, which opens every Sunday morning from 5 am to 9.30 am (1 April to 31 October) or 7 am to 9.30 am (1 November to 31 March). You can get up in the morning and be at the Fish Market in a few steps. Here you can enjoy a freshly brewed coffee, cappuccino or café au lait, accompanied by a fresh fish roll or a crêpe amid the hustle and bustle of visitors and market criers.

Or you can go directly to the old fish auction hall to dance and have breakfast with live music.

Hamburg

Fish Market, St. Pauli

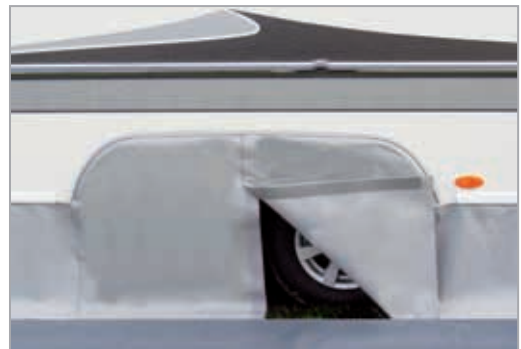

The city centre is within walking distance of the parking lot: Michel, Millerntor, Reeperbahn and Heiliggeistfeld are just a few minutes away.

They are only a stone's throw away from the former Soviet espionage submarine U-434 and from the landing bridges. From the latter, you can start a city tour in a double-decker bus, take the shuttle boats to the beaches or musicals in the harbour, start small and large harbour tours or switch to the Elbe side through the Elbe tunnel.

In an approx. 20-minute walk along the Elbe promenade, you can walk from the landing stages past the museum ships of Rickmer Rickmers and Cap San Diego to the Elbe Philharmonic Hall and the newly-designed harbour district. There you can visit the Miniatur Wunderland, the Spice Museum, the Speicherstadtmuseum, the International Maritime Museum, the „Scharhöörn“ Senate yacht, the „No.5 Elbe“ pilot schooner, the „Prototyp“ car museum and other sights.

All and all, you could not find a more central and eventful quarter.

HINDERMANN MULTIFUNCTIONAL WELT

In the plastic eyelets of this grey textile welt, you can hang e.g. S-hooks, in order to have a practical and diverse hanging possibility for small items. With its standard 7 mm diameter it fits practically on any welt rail. Available in 200 cm length (without hook).

Length	Material / Colour	Article No.
200 cm	textile piping / grey	8969-6450

HINDERMANN FLOOR SKIRT / WINDBREAK

Living quality in the awning Wind and privacy screen on caravan

Qualities:

Vinyl film with linen texture and PVC welt
Cover material, reinforced and weatherproof fabric with textile welt
Heights: 50 cm and 75 cm
Lengths: 3,0/4,0/5,0/6,0/7,0/25/50 meters
Wheel arch covers: 75 cm-high, 150 cm-long

The welt is always welded on and can be trimmed from either end with a robust pair of scissors without risk of a thread coming loose. The heavy-duty, welded-in rust-proof PVC eyelets ensure long-lasting secure attachment.
The floor skirts made from light grey tarpaulin material with end definition 4440 are compatible with the HINDERMANN WHEEL HOUSING COVERS, FIT COVERS, CARAVAN COMPARTMENTS, FLOOR SKIRTS WITH LOWERED DOOR ENTRANCE as well as HINDERMANN ORGANISER SKIRTS.

Umbra grey

self gluing velcro for fixing the fitted wheel cover to the floor skirt, set of 2, 50 cm length

8939-0000

HINDERMANN WHEEL PROTECTION COVER REFLEX

For cars, caravans and mobile homes. The cover has a reflecting front surface to shield off UV rays which could damage the tyres as well as for lower heat impact and for protecting the tyres. This way, your tyres keep longer. Good fit thanks to three-dimensional finishing. The cover rests on the tread and cannot slip off. The integrated welt provides shape and support. Integrated eyelets of pegs for secure fixing.

HINDERMANN **CARAVAN CELLAR**

Expand your storage compartment – dry, clean and safe

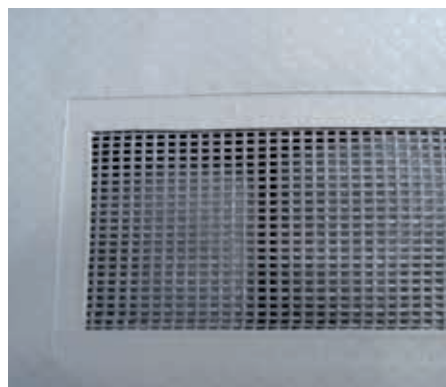

Expand your storage compartment under your caravan with pockets waterproofed welded with the floor-skirt. Because of the 2-way-zipper you have a comfortable access. Each pocket is including a screen-fabric to avoid condensation. Use the pocket of the caravan cellar under your vehicle as a cool and hygienic storage place for food and beverages, children's toys or other

objects like shoes or boots. The grip-strip is welded, so you can cut the skirt or the wheel-cover with strong scissors or a knife to fit your caravan.

Size of the pockets:
about 80 x 35 x 35 cm
Height of the skirt: 50 cm
Thickness of the welt: 7 mm

- 4 Fitted Wheel Section Cover for various models available (see page 62)

HINDERMANN SPECIAL FLOOR SKIRTS

Example of assembly – universal version

Assembly and adjustment is easy:

Pull in the floor skirts continuously.

Raise the floor skirts in the door entrance area and pull the short textile weatherstrip piece towards the front of the Velcro side. Fix both parts together (photo shows the principle of the Velcro fastening for continuous pulling).

Cut vertically to the left and right of the door entrance with a sturdy pair of scissors down to the lower welt, then cut across. If possible, cut around both corners.

 Can easily be shortened at each end with a sturdy pair of scissors.

These new floor skirts, specially developed for caravans with lower door entrances, can be individually adapted by hand for each caravan with a door entrance that is set deeper for Tabbert/Fendt/Wilk, regardless of where the door welting tracks are positioned. **Also suitable for Fendt > 2016.**

Detail: Fastening belt

for Camper cable drum

A practical storage place which protects the cable spool against moisture, dirt, sand and damages. The cable spool is simply placed in the bag. Because of the the 4-way zipper you have access to the handle as well as to the cable itself. An additional opening-flap at one side enables the electric supply. In this way, it is kept clean and is always ready for the next use. For a safe fixing inside your vehicle, e.g. in the rear-garage, there is an adjustable belt at the backside of the bag. Material: Light-weight tarpaulin in colour combinations light-dark grey, washable inside and outside

Version	Size	Article No.
for 25 mtr. cable drum	30/15x39x24 cm	7108-4441
for 50 mtr. cable drum	37/21x45x24 cm	7109-4441

Reinforced floor made from double-layered tarpaulin fabric

HINDERMANN CARRYING BAGS

Ideal for storing the toilet cassette in the vehicle.

for waste tank and other storage options

This bag can be used not only for the discrete transport of the waste tank at the campsite but also for the storage and transport of the second tank. Because of its new near watertight design, the bag can also be used, for example, as a beach bag for wet items, e.g. towels or children's toys. The bag is easy to clean.

HINDERMANN **DOCUMENT/MAGAZINE-CASES**

Magazine pocket

Pocket rack

Tasteful design and practicality come together in these stylish car case pockets.

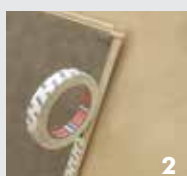

You can find practical uses for these almost everywhere in your vehicle: In the seating area, the sleeping area or the kids' room, in alcoves or even at home. Flexible attachment – wherever you need it.

The material chosen was carefully-stitched soft high-quality imitation leather. A reinforced bottom plate with two covered press-studs on the back is used for attachment.

All this makes these practical pockets an eye-catching detail in any vehicle.

Colour: Grey / Cream.

The advantage of the attachment

The "tesa Powerband" is a double-sided adhesive tape with a very strong adhesive force, which can be removed later without residue.

No screws.
No drilling.
No tape.

1. Clean the surface of the desired area.
2. Stick the tape vertically on the back of the organiser.
3. Remove the paper strip, do not touch adhesive surface
4. Lay the organiser flat on the desired area and press down firmly.
5. Removing: Carefully remove the organiser from the surface.
6. Remove the adhesive strips parallel to the surface.

HINDERMANN **LARGE POCKETS**

Long life and maximum use and storage volume are paramount.

This is all a question of having the right size. For every requirement – for motor homes, caravans, awnings, boats or at home – we offer the perfectly tailored organiser.

Mobile shelving in mix-color optics

Sensible solutions for storage, creating order and enabling you to keep track of your things. Not only useful on your camping holidays, but also useful helpers at home. You can unfold the new multi-talents from HINDERMANN with just one turn to build a shelf or a wardrobe. Because of the reinforced bottoms these allrounders enable a separate storing of clothes, towels/toys/shoes/magazines/books/drinks/glasses etc.

In correspondence with the HINDERMANN promise of quality, this product series is made out of a particularly strong NONWOVEN fabric with strengthened intermediate floors. The fixing takes part by using loops with strong velcro.

These mobile racks are available in fresh new colors. The outside surfaces are made in light grey and the reinforced bottoms in smoke grey. A appealing splash of color are the outer edges in the colour "carrot".

You can unfold the new multi-talents from HINDERMANN with just one turn to build a shelf or a wardrobe. Thanks to the flexible sides, they can be folded together again like a concertina and stored without needing a lot of space
